NOTICE OF CURRENCY DESIGNATION

Designation of Ether (ETH) as an Accepted Payment Currency

Issued by	Miloš M. Ilić — aethyr-global.com
Notice type	Unilateral Currency Designation
Applies to	All IP Licence Agreements issued by aethyr-global.com
Governing law	Republic of Serbia
Date	_____

TO ALL LICENSEES:

Pursuant to the payment provisions of each Intellectual Property Licence Agreement issued by the undersigned Licensor at aethyr-global.com — including but not limited to the IP Licence Agreement — Advanced Antimatter Systems ("GIGA Agreement"), the IP Licence Agreement — HST AI Architecture with Closed IF Set ("SMALL Agreement"), and all associated Terms and Conditions — which provide that payments shall be made in Euros (EUR) or **such other currency as Licensor may designate in writing**,

Licensor hereby formally designates:

Ether (ETH) <i>the native cryptocurrency of the Ethereum blockchain network</i>

as an accepted currency for satisfaction of all monetary payment obligations arising under any Licence Agreement issued by aethyr-global.com, effective immediately upon publication of this Notice.

This designation is in addition to — and does not replace — the existing EUR payment option. Licensees may elect, for each individual payment, to pay in EUR by wire transfer as previously agreed, or in ETH through the means specified below.

ETH PAYMENT INSTRUCTIONS

Smart Contract	AethyrOneTreasury — address published at aethyr-global.com
How to pay	Call pay(memo) — set ETH amount, enter memo, send
Memo format	"Legal Name — Period — Licence Type"
Memo example	"Acme Corp — FY2025 Q2 — Antimatter NPV"
Verify address	Call getTreasury() on the contract before each payment
Conversion rate	CoinGecko ETH/EUR spot rate at block confirmation timestamp
Rate risk	Borne by Licensee — initiate with sufficient margin
Gas fees	Borne by Licensee

Licensees are strongly advised to verify the Smart Contract address at aethyr-global.com before each payment. Licensor bears no responsibility for payments made to any other address.

On-chain payment records on the Ethereum blockchain constitute valid evidence of payment for all purposes under the applicable Licence Agreement.

CONVERSION RATE

The applicable EUR/ETH conversion rate for any payment is the ETH/EUR spot rate published by CoinGecko (coingecko.com) at 00:00:01 CET on the calendar date on which the ETH transaction is confirmed on the Ethereum mainnet blockchain. The Transaction Date is determined by the block confirmation timestamp, not the time of initiation.

If the ETH amount tendered is insufficient at the applicable rate, the shortfall is treated as a late partial payment under the terms of the applicable Licence Agreement, with the remaining balance due within fifteen (15) days of Licensor's written notice.

Licensor will confirm receipt and EUR equivalent of each ETH payment in writing within ten (10) business days of the confirmed transaction.

Issued and declared by Licensor:
