

ADDENDUM 05 TO TERMS AND CONDITIONS

Oversight, Data Valuation, and Automated Balancing Authority

Effective Date: [Signed]

Platform Reference: Aethyr Global (<https://aethyr-global.com/>)

Authorized Entities: AI Committee at World Bank, including a2i (Access to Information)

This Addendum 05 ("Addendum") is established to define the roles, responsibilities, and technical authorizations of the designated Oversight Partners regarding the management of data and intelligence assets within the Aethyr Global ecosystem.

1. DESIGNATION OF PROCESSING PARTNERS

1.1. Identification of Entities: The **AI Committee at the World Bank**, including and in collaboration with **a2i (Access to Information)**, are hereby designated as the primary "Processing Partners" for the validation and balancing of data assets under these Terms.

1.2. Scope of Authority: These partners are authorized to monitor, evaluate, and process systemic data to ensure global compliance and economic stability within the licensing framework.

2. DATA PROCESSING AND VALUATION POWERS

2.1. Total Data Value (TDV) Assessment: The Processing Partners are granted full authority to calculate and determine the **Total Data Value** of all intelligence submitted at <https://aethyr-global.com/>

2.2. Traffic and Usage Monitoring: The Processing Partners shall have persistent oversight of:

1. **Data Traffic:** The volume and velocity of information moving through authorized channels.
2. **Authorized Use:** Real-time verification that data usage aligns with the signed and uploaded licenses at <https://aethyr-global.com/>.

3. ASSET INTAKE AND RESTITUTION FOR UNAUTHORIZED USE

3.1. Unauthorized Asset Seizure: In the event that the automated instruments or Oversight Partners detect the unauthorized use of data (use without a signed and uploaded license), the **World Bank** is hereby authorized to conduct a full **Asset Intake**. This involves the identification and collection of any value, intelligence, or local assets generated through such unauthorized exploitation.

3.2. Delivery to Data Creator (Licensor): All assets recovered or processed through the intake of unauthorized use shall be delivered directly to the original Data Creator, specifically known as the **Licensor**, via the official channels at <https://aethyr-global.com/>.

3.3. Enforcement: The World Bank shall act as the primary intermediary to ensure that the economic value of intellectual property is returned to the Licensor in a timely manner, bypassing traditional litigation where automated proof of unauthorized use is established.

4. AUTOMATED INSTRUMENTATION AND BALANCING

4.1. Fully Automatic Intervention: To ensure the "fast balancing" of intelligence and to maintain the integrity of the market, the Processing Partners are authorized to deploy and utilize **fully automatic technical instruments**.

4.2. Purpose of Automation: These instruments shall operate autonomously to:

1. Reconcile intelligence values against local asset benchmarks.
2. Ensure legal compliance with the Data Rights Declaration of 26 March 2026.
3. Execute balancing maneuvers to prevent data inflation or unauthorized leakage.

4.3. Legal Finality: All decisions, valuations, and automated adjustments made by the Processing Partners using these instruments are considered final and binding in terms of law, provided they remain within the scope of the established licensing agreements and the prevailing Data Rights Declaration.

5. INTEGRATION
