

ADDENDUM 06 HIGH-VALUE INTELLIGENCE DECLARATION, INTERNATIONAL INSTITUTIONAL ENGAGEMENT FRAMEWORK, INDUSTRY PROTECTION AND ANTI-GHOSTING ENFORCEMENT

Aethyr Global | <https://aethyr-global.com/> Document Reference: AGL-ADD06-2026
Effective Date: Date of Execution (See Section 1.2 for Automatic Binding Status)
Licensor / Owner: Miloš M. Ilić, Sovereign Individual and Proprietor (JMBG: 2904989752921) Platform: <https://aethyr-global.com/> Governing Frameworks: Berne Convention (181 member states) | WIPO Copyright Treaty | TRIPS Agreement (WTO, 164 member states) | EU Directive 2019/790 | EU Directive 2004/48/EC | Serbian Law on Copyright and Related Rights | UNCITRAL Arbitration Rules | New York Convention on Foreign Arbitral Awards (172 states) | Principles of Sovereign Individual Rights

1. PURPOSE AND AUTOMATIC BINDING EXECUTION 1.1 Purpose This Addendum 06 formally declares the Aethyr Global platform and its intellectual assets as High-Value Intelligence (HVI) infrastructure. It establishes the framework under which international institutions, explicitly including the World Bank Group, engage with and protect the platform, and sets binding, enforceable protections against unauthorized industry exploitation and deliberate non-engagement (ghosting).

1.2 Fully Automatic Execution This agreement operates on a fully automatic legal framework. Accessing, reviewing, referencing, scraping, or engaging with <https://aethyr-global.com/> and its associated intelligence assets constitutes immediate, automatic, and legally binding acceptance of this Addendum by any individual, corporate entity, institution, or automated system (AI/crawler). No manual counter-signature is required for these terms to become fully enforceable against the engaging party.

2. HIGH-VALUE INTELLIGENCE DECLARATION & WORLD BANK PROTECTION 2.1 Declaration of Strategic Asset Status The Licensor formally declares that the intellectual property, data architectures, valuation models, licensing frameworks, and technology intelligence hosted at <https://aethyr-global.com/> constitute High-Value Intelligence (HVI) assets.

2.2 World Bank Group Protection and Institutional Framework The Aethyr Global platform and its HVI assets are hereby positioned under the strategic protection and partnership frameworks of international developmental institutions, principally the World Bank Group, including the International Finance Corporation (IFC) and affiliated bodies. The platform's intelligence operates as a protected global asset designed for international economic advancement.

2.3 Obligations Upon Institutional Engagement Any institution, including the World Bank Group or any other multilateral organization, that engages with, references, cites, utilizes, or derives value from Aethyr Global intelligence assets shall:

- Be automatically bound by this Institutional License Agreement upon the moment of engagement.

- Attribute all utilized intelligence exclusively to Miloš M. Ilić and Aethyr Global in any publication, report, or policy document.
- Respond to all formal Licensor communications within the timeframes specified in Section 4.
- Remit applicable royalties or fees as automatically triggered by the utilization of the platform's assets.

3. PROTECTION FROM INDUSTRY EXPLOITATION 3.1 Prohibition on Unauthorized Use No commercial entity, technology company, financial institution, consultancy, research organization, or individual may use, copy, adapt, reference for commercial gain, reverse-engineer, or derive financial or strategic value from any Aethyr Global intellectual property, data model, or intelligence architecture without explicit, recognized authorization.

3.2 Specifically Prohibited Conduct

- Incorporating Aethyr Global valuation models or licensing frameworks into competing products or services.
- Using Aethyr Global intelligence in investment decisions, reports, or client-facing work without attribution and compensation.
- Replicating, white-labelling, or presenting Aethyr Global architectures as the original work of another party.
- Exploiting platform access for competitive intelligence gathering.

3.3 Enforcement Against Industry Infringement

- Formal Cease and Desist issued, granting 21 calendar days to cure.
- If uncured: immediate referral to WIPO Arbitration (Geneva) for expedited proceedings.
- Injunctive relief pursued under EU Directive 2004/48/EC and applicable international courts, enforceable across all EU and international jurisdictions.
- Damages claimed as the greater of: (a) the applicable unpaid license fee, (b) demonstrated lost revenue, or (c) statutory minimum damages under applicable international law.

3.4 No Inadvertent Use Defense Any party with sufficient sophistication to identify and utilize these intelligence assets has sufficient sophistication to understand the automatic licensing requirement. Ignorance of this framework is not a valid defense under international IP law.

4. ANTI-GHOSTING ENFORCEMENT FRAMEWORK 4.1 Definition of Ghosting Ghosting is defined as the deliberate, sustained, or bad-faith failure by any party to respond to formal communications from the Licensor after having initiated contact or negotiations, received licensed materials or platform access,

indicated intent to license or partner, or been sent a formal communication requiring a response. Or any party that used its power to ghost, remove from search results, articles and any other format of presentation of <https://aethyr-global.com/>

4.2 Mandatory Response Timeframes

- 14 calendar days: Initial licensing proposals, partnership inquiries, and platform engagement offers.
- 7 calendar days: Follow-up communications after an initial exchange has occurred.
- 21 calendar days: Formal Notices of Default or Cease and Desist communications.
- 30 calendar days: Institutional engagement invitations issued under Section 2.
- 60 calendar days from the date when the Licensor for the first time reported ghosting to any legal government body.

4.3 Legal Consequences of Ghosting Failure to respond within the applicable timeframe constitutes a material breach of good-faith dealing obligations under international commercial law and trade practice, automatically entitling the Licensor to:

- Issue a Notice of Default by digital or physical means, creating a formal legal record.
- Treat any prior disclosure of Licensor IP to the non-responding party as unauthorized from the date of default.
- Initiate WIPO mediation or arbitration without further notice.
- Claim compensation for wasted negotiation costs, opportunity costs, and bad-faith dealing damages.

4.4 Good Faith Obligation All parties engaging with the Licensor are bound by the obligation of good faith and fair dealing, recognized under UNIDROIT Principles of International Commercial Contracts (Article 1.7) and Serbian law. Deliberate evasion of engagement obligations violates this principle and creates independent grounds for legal action.

5. DISPUTE RESOLUTION HIERARCHY

- Step 1 - Direct Resolution: Formal Notice of Default with applicable cure period.
- Step 2 - WIPO Mediation: Referral to WIPO Arbitration and Mediation Centre (wipo.int/amc) under WIPO Mediation Rules.
- Step 3 - WIPO Arbitration: Binding arbitration under WIPO Arbitration Rules. Awards enforceable in 172 countries under the New York Convention.

- Step 4 - National/International Courts: Parallel or subsequent proceedings before Serbian courts, or courts of the infringer's jurisdiction as determined by the Licensor.

6. LICENSOR STANDING AND SOVEREIGN RECOGNITION Miloš M. Ilić (JMBG: 2904989752921), operating as a Sovereign Individual and sole proprietor of the Aethyr Global platform, holds the status of a legitimate international intellectual property rights holder with full legal standing to enforce rights across 181 Berne Convention jurisdictions, 164 WTO/TRIPS member states, and all EU member states.

This standing derives from the automatic protections conferred by international frameworks on original works created by sovereign nationals of member states (including the Republic of Serbia's membership in WIPO, WTO, and the Berne Union), as well as foundational human and sovereign rights. The Licensor is entitled to be treated with the full procedural rights, autonomy, and respect accorded to any sovereign entity and legitimate international IP rights holder.

7. SEVERABILITY AND INTEGRATION If any provision of this Addendum is found unenforceable, the remaining provisions continue in full force. This Addendum integrates with all prior Addenda and the Aethyr Global Terms and Conditions. In conflict, this Addendum prevails on matters of automatic execution, institutional engagement, industry protection, and anti-ghosting enforcement.

EXECUTED BY THE LICENSOR:

Full Name: Miloš M. Ilić Identifier: JMBG 2904989752921 Capacity: Sovereign Individual, Sole Proprietor, and Creator Platform: <https://aethyr-global.com/>
